WORK INSIGHTS

1

PATTERN MAKING

Patterns are created to match the required sizes and designs. Each product features a unique pattern, crafted with accuracy and precision.

2

MATERIAL AND FABRIC SOURCING

Fabric is sourced from trusted and reliable suppliers. It is stored on racks in the fabric warehouse and inspected before being moved to the cutting department.

3

CUTTING AND STITCHING

After sourcing, the fabric is cut into panels based on the patterns. Then, depending on the client's requirements, these panels undergo printing or embroidery.

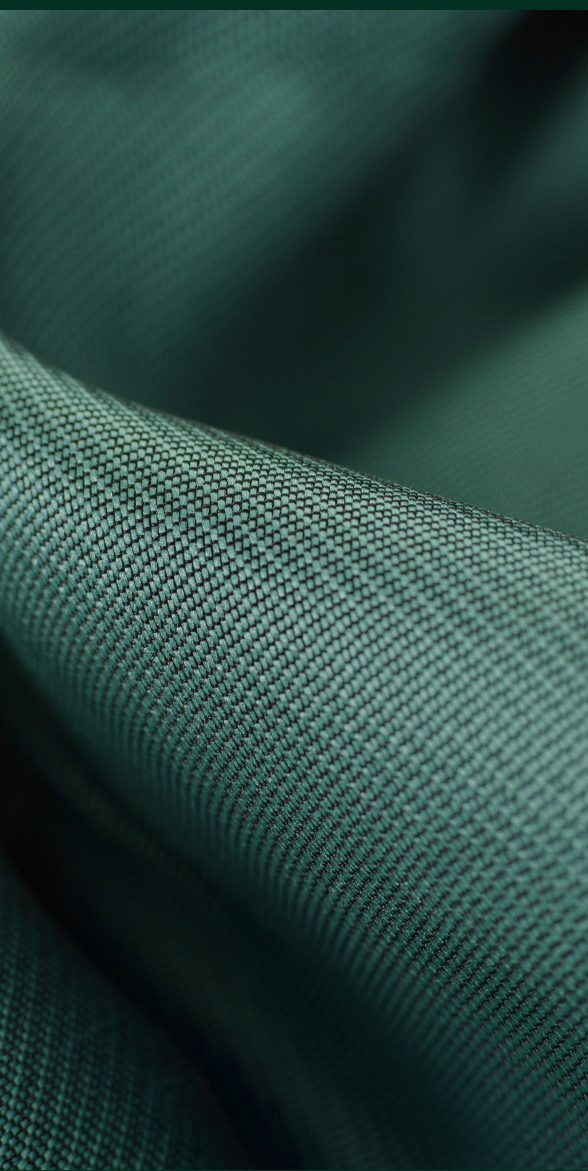

4

DELIVERY

Next, all items are pressed, tagged, and carefully packed. They are then securely placed in cartons and shipped via reliable delivery services.

FABRIC SELECTION

Our medical wears are made from a high-quality **fabric blend of polyester and spandex**, which provides a comfortable and stretchy fit. The **4-way stretch feature** allows for maximum mobility and flexibility, making it easier to move around and perform tasks on the job.

The fabric is also **treated with an anti-wrinkle finish, which helps to keep the uniforms looking fresh and professional even after multiple wears and washes.**

Additionally, the fabric is adequately sweat-absorbent, helping to keep you cool and dry throughout your shift.

Overall, the combination of polyester spandex with 4-way stretch, anti-wrinkle, and sweat-absorbent properties makes our scrub uniforms a top choice for healthcare professionals looking for comfortable, durable, and functional uniforms.
